

**Note on coaching**

The aim of my work as a coach is to support the process of personal development. I expressly point out that my work does not replace medical treatment, diagnosis or therapy by a doctor, psychiatrist, psychotherapist or alternative practitioner. The concept of "Coaching in the EmptyRoom" and my support as a coach serve to stimulate development-supporting processes in the form of help for self-help. If there are any doubts as to whether the use of coaching and my services as a coach could impair the effectiveness of medical or therapeutic treatment, this should be discussed with the treating doctor before beginning.
